Subject: RE: Blades Groundwater

Thanks, Nancy. I'll let you know if I have any problems accessing the files.

Subject: Blades Groundwater

Hi [redacted],

I sent you a link with some background info on Blades – a previous SI conducted by DNREC for the Peninsula Plating facility, an SI conducted by DNREC for the Procino plating facility, and a RI conducted by contractors for Procino. There's a DNREC factsheet about the discovery of PFAS in the public supply wells and a scientific paper on the solubility and adsorption of PFAS to soil.

The previous sampling and investigations at the facilities did not include analysis for samples for PFAS. There is documentation – a photo in the case of Procino and a list of chemicals observed onsite in 1995 by the EPA OSC for Peninsula – that these facilities used a PFAS containing surfactant in the electroplating process.

Thanks!
